CORPORATE TAMBOLA · ORGANIZER'S ONE-PAGE MANUAL

Set up your game in 10 small steps.

Online housie for your closed group: employees and their families, dealers, customers, vendors. Every mistake on a screen explains itself and tells you what to do next, so you cannot get stuck.

WHAT YOU NEED

An e-mail address and a phone with WhatsApp. About 15 minutes. Your players need only a phone and your link: no app, no password, no payment from them. Not sure yet? Start with a free demo game for up to 10 people (every screen says DEMO GAME).

1 Sign in

corporatetambola.com → Log in

1. Type your **e-mail**. We send a **6-digit code**: type it, or tap the sign-in link in that e-mail. Both do the same thing.
2. No password, ever. The code is good for one sign-in.
3. Press **Start a new game**, or **Start a free demo game** to try it first.

Bookmark your console: you come back to it for every step below.

2 Date and time

Console step 1

1. Pick the occasion, the **day and time** (India time). Name the game if you like.
2. The **first number is called 2 minutes after** the start time; players use those minutes to join.
3. Choose **who calls the numbers**: the software at a steady speed, or a Host presses **Next number** for each one.

The calling mode cannot be changed once the game has started.

3 Number of players

Console step 2

1. Pick the **biggest crowd** you expect (invited guests count too).
2. **Who can join:** only people on your list, or anyone with the link.
3. **1 or 2 tickets** each, the speed (6 to 15 s a number), up to 5 rounds, and whether guests may invite others.

A demo game stays at 10 people until you make it a real game.

4 Prizes

Console step 3

1. **Tick the prizes**: Early Five, lines, Four Corners, Star, Full House and more. Each says how to win.
2. Set **how many winners** each prize has (1st, 2nd, 3rd…) and **what the prize is**.
3. Choose the **tie rule**: people finishing on the same number take the next prizes one by one, or share that prize.

You hand the prizes over. We only find the winners.

5 Brand moments

Console step 4 (optional)

1. An **opening** while players wait, up to 3 **breaks** during the game, a **closing** at the end.
2. Each can be your **video, YouTube link, slides or a speech**; a break can also be a **lucky draw**.
3. Add your **logo and colour**: they appear on every ticket.

Everything plays on every phone at the same moment.

6 Hosts and Co-hosts

Console step 5 (optional)

1. Add up to **5 Hosts** (their e-mail or mobile). Each gets a link and sets up once.
2. A Host can run the game day, pause, end it, press Next number and pay. A **Co-host** helps with one game only.
3. You can retire a Host at any time.

A Help Desk partner can prepare the game for you; only you publish and pay.

7 Invite and share

Console step 6

1. Copy the **guest link** or send it on **WhatsApp**; or add people to **My people** (type, paste or upload) and send personal links.
2. Show the **number screen** on a TV, or share it in Google Meet, Zoom or Teams (optional).
3. **My board** (the full housie board) is for you alone. Do not share that window.

Real housie: players see only the number just called and tap it on their ticket themselves. A prize is won by pressing Claim before the next number; a wrong claim is a Bogey, two on the same prize and the ticket is out of it.

8 Check and publish

Console step 7 · free

1. Read the summary. Confirm your **e-mail and mobile number**.
2. Press **Confirm and publish**. Players can now open the link and get their tickets.
3. A demo game is live at once, free. A real game still needs step 9 before it starts.

Publishing is free and can be done days ahead.

9 Pay

Console step 8 · once per game

1. Pay **before the start time**; an unpaid game does not begin. A late payment starts it 2 minutes after paying.
2. Pay yourself, or send a **pay link** to whoever pays in your company. A Host or Co-host may pay too.
3. Your **invoice** arrives by e-mail. No yearly plan.

A demo game: press "Make this a real game", choose the size, pay. The game carries on.

10 Game day

Console step 9

1. **Open your console before the start time.** That is what lets Pause and End the game reach every phone.
2. Numbers come on their own, or you press **Next number**. You can **Pause**, **message every phone**, or **End the game**.
3. Players tap each number and press **Claim** before the next number. The software checks every claim against the called numbers; nobody can cheat, not even you.

A wrong claim is a Bogey: it does not count. Two Bogeys on the same prize and that ticket is out of it. Prizes still open are listed on top; claimed ones are crossed out.

11 After the game

Console step 10

1. Each winner **confirms their name and number** on their own phone; you tick **Prize given** when you hand it over.
2. Your **report (PDF)** is e-mailed: timings, numbers, prizes, winners, who invited whom.
3. Players' names and numbers are **erased within a day**; winners' details stay 365 days for your records.

Press "Create a new game like this one" to reuse the whole setup.

! If something goes wrong

You are never stuck

- Every message says **what happened, what to do, and takes you to the exact box**. Nothing you typed is lost.
- Internet dropped? Phones catch up on their own with the same numbers.
- A player with two phones gets one ticket; the second phone is told politely.
- Still stuck? **WhatsApp +91 96503 97480** with the reference shown on the screen.

Golden rules: test with a free demo first · share the link early · open your console before the start.
